Barcelona, Spain

Software engineer with 2+ years of experience in fullstack development and automation. I have worked in multilingual teams for tech companies, industrial firms, and freelance clients. Having lived in several countries and speaking 6 languages give me the versatility to adapt to new teams and contribute from day one.

EDUCATION

Computer Engineering - **Universidad Politécnica de Madrid (UPM)**
Madrid, Spain *2019 - 2024*

International Baccalaureate (IB) - **St. Catherine's Moorlands School (SCMS)**
Buenos Aires, Argentina *2018*

WORK EXPERIENCE

Frigorífico Gorina, Buenos Aires
Process Optimization Analyst - Full-time *April 2026 - August 2026*

- Built, as the sole developer, a Python desktop application to extract data from health-permit PDFs and generate the corresponding certificates, cutting the time to complete permit applications by 95%.
- Developed an automated system for certificate approval, lookup, and download, standardizing templates and establishing the tool as the department's standard solution, using Google Cloud, Azure Function Apps, and GitHub.

Globalthy, Madrid
Fullstack Developer - Full-time *April 2025 - April 2026*

- Led the end-to-end development of Globalthy, a healthcare platform for booking appointments with verified specialists in Spain, taking it from scratch to production as the lead fullstack developer, with 300+ clients and professionals registered.
- Built core features including appointment booking, video calls, messaging, and payments with Stripe, using TypeScript, React, Next.js, MySQL, REST APIs, and authentication, deployed on AWS with Docker, using GitHub and Agile/Jira workflows.

Globant, Madrid
Fullstack Trainee - Internship *February 2024 - May 2024*

- Collaborated in a multilingual team (English, Portuguese, Spanish) developing an internal web platform with TypeScript, in an Agile workflow with GitHub, to centralize management of users without an assigned client, replacing a previous manual process.

FREELANCE PROJECTS

Freelance Developer *June 2024 - Present*

- Independently designed and delivered 4+ web projects, live in production and active use, for clients across different sectors.
- Built a theater platform and an arts e-commerce store, both SEO-optimized, plus a digital photography portfolio and a consultancy landing page. Used Next.js, TypeScript, PostgreSQL, Firebase, and Supabase, with Sanity as CMS, GitHub version control, and automated deployments.

RELEVANT SKILLS

- **Programming Languages:** Java, Python, C, JavaScript, TypeScript, SQL
- **Web Development & Databases:** HTML, CSS, React, Next.js, Node.js, MySQL, PostgreSQL, Firebase, Supabase, REST APIs, Stripe, Sanity
- **Cloud, DevOps & Tools:** AWS, Google Cloud, Azure, Docker, GitHub, CI/CD pipelines, Jira, Agile
- **AI & Automation:** AI-assisted development, LLM integration via APIs, MCP integration and usage, agentic workflows, Python automation

LANGUAGES

- **Spanish** - native
- **English** - bilingual
- **Portuguese** - advanced
- **Armenian** - advanced
- **French** - intermediate
- **Japanese** - basic

HOBBIES

Participating in chess tournaments, creating digital art, playing sports, and reading, especially about philosophy and business.
