## WORK EXPERIENCE

### Process Optimization Analyst

Frigorífico Gorina, *April-August 2026*

- Built a Python desktop application to extract data from health-permit PDF applications and automatically generate the corresponding official certificates.
- Cut application loading and form-filling time by 95% by standardizing templates and business rules.

### Fullstack Developer

Globalthy, *April 2025-April 2026*

- Led the end-to-end development of a web platform, taking it from scratch to production as the project's sole fullstack developer.
- Built the frontend, integrating it with the database and using external APIs and an authentication system, with version control and continuous deployment.

### Freelance

Self-employed, *June 2024-Today*

- Independently designed and delivered 3 web projects for clients across different sectors: an institutional platform for a theatre, a landing page for a consultancy, and an e-commerce site for an arts venture.
- Designed an automatic certificate-approval system based on predefined parameters (ARCA).
- Developed a background program to automate certificate lookup and download, saving hours of manual work.

### Fullstack Trainee

Globant, *February-May 2024*

- Collaborated in a multilingual team (English, Portuguese, Spanish) on an internal web platform to centralize management of unassigned-client users, replacing a previous manual process.

## EDUCATION

### Software Engineering Degree

Universidad Politécnica de Madrid (UPM)

2019 - 2024

### International Baccalaureate (IB)

Saint Catherine's Moorlands School

2018

## RELEVANT SKILLS

- **Programming languages:** Java, Python, C
- **Web development:** HTML, CSS, JavaScript, TypeScript, React, Next.js
- **Databases:** SQL (PostgreSQL, MySQL)
- **Cloud y version control:** Google Cloud, Azure, Git

## LANGUAGES

- Spanish — native
- English — bilingual
- Portuguese — advanced
- Armenian — advanced
- French — intermediate
- Japanese — basic

## INTERESTS

Chess, digital design, football and theatre.
